I checked w/ Gail and she said she sent the attached to Mark on Friday. Let me know if you need me to do any further following up.

Thanks,

Scott

Scott,

FYI, here are the edits I sent Mark on Friday – I am checking with Mark to see if he needs more input.

Given Mark's retirement plans, what do you think about filling his position with someone who has experience in emissions modeling? It would be helpful having someone who can run SMOKE and do emissions QA.

Thanks,

Gail

Mark – I attached some edits describing the model domain.

Thanks,

Gail

**Subject:** Review of Uinta Basin Emission Inventory Preparation Plan

I have prepared a very draft inventory preparation plan for the Uintah Basin. We want to express to the tribe, state and eventually the oil and gas industry how we would like an inventory to look for the Basin. We realize that we may have to eventually FIP the area in order to bring it into compliance with the Ozone NAAQS. Therefore we hope to have an EI prepared to help us assist in what control strategies may be necessary to bring the area into attainment. The inventory provides the first step.

Gail, I need your help on the modeling discussion. Please add your preliminary thoughts on what you would like to see done regarding modeling for the area.

Richard, please refer to Appendix A where I included a discussion of the monitoring data. You were going to provide for me a discussion of particulate concentrations found in the Basin

Thanks for your help. I will be in the office on Tuesday, December 30 to review your comments.

Mark
